

Charter OS

QUICK START GUIDE

Everything you need to build your first AI-powered Product Charter

5 Steps

to a complete charter

6 AI Agents

working in sequence

5 Gates

human approval at each

~2 Hours

first charter end-to-end

WHATS INSIDE

- **Page 2** Getting Started — Login & Dashboard
- **Page 3** Step 1: Team & TOR · Step 2: Problem Statement
- **Page 4** Step 3: Vision & Strategy · Step 4: Value Realisation
- **Page 5** Step 5: Product Roadmap · Export Your Charter
- **Page 6** TPO Admin Portal · Tips & Troubleshooting
- **Page 7** Complete Charter Checklist — Quick Reference

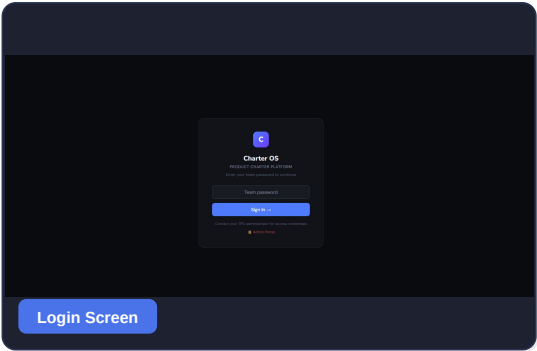

For Product Office teams — ask your TPO administrator for your team access credentials

Before You Begin

CharterOS is a team tool — you need a team password from your TPO administrator to log in. Each department has its own password. Once logged in your progress auto-saves to the cloud every few seconds.

STEP 1

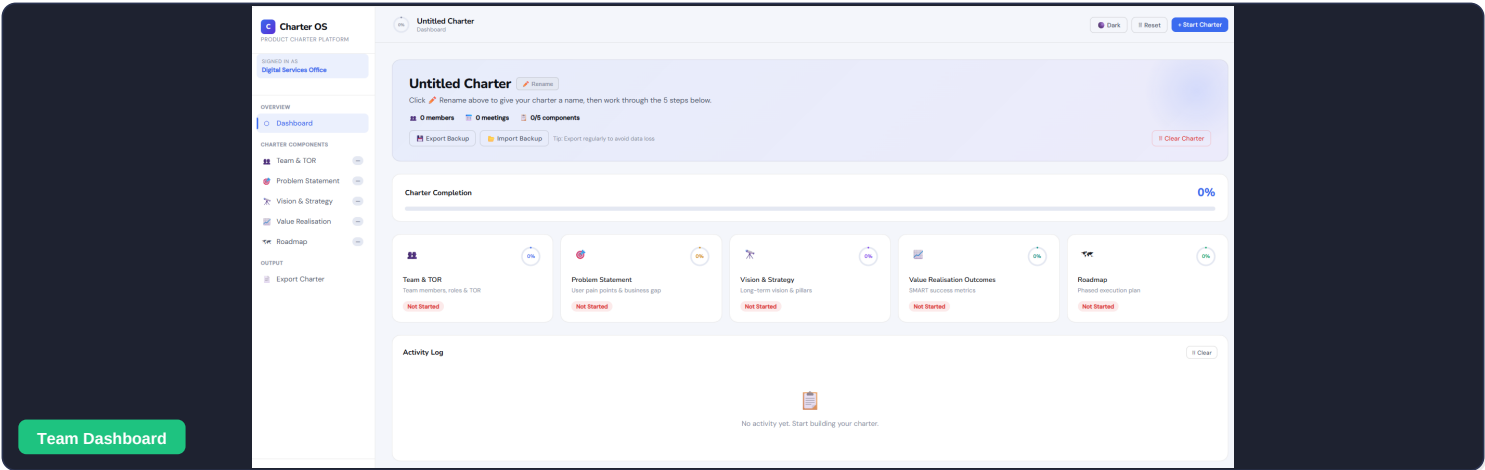

Login to CharterOS

- Enter your team password**
Your TPO admin provides this — each team has a unique password
- Click Sign In →**
You are taken directly to your team's charter dashboard
- Admin access**
TPO admins use a separate password at the Admin Portal link

STEP 2

Understand Your Dashboard

- Charter Name**
Click Rename to give your charter a meaningful name — this appears on all exports
- 5 Component Cards**
Each card shows the section status (Not Started / In Progress / Complete) and completion %
- Progress Bar**
Overall charter completion — reaches 100% only when all 5 sections are fully approved
- Activity Log**
Every AI generation, approval and edit is timestamped here — your full audit trail

STEP 1 OF 5

Team Structure & TOR

Add Team Members

Click **+ Add Member** . Enter **name** , **role** and **key responsibilities** . Add all Product Office team members.

Set Meeting Cadence

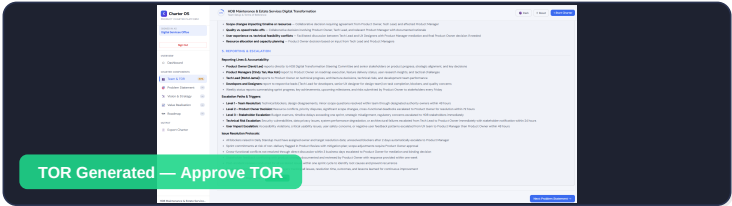

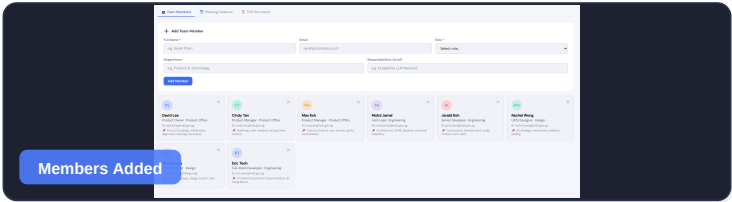

Define your standups, reviews and planning sessions — enter **name** , **frequency** and **purpose** for each.

Generate TOR

Click **Generate TOR** . The AI drafts a complete 5-section Terms of Reference in seconds.

Review & Approve

Read through all 5 sections. Click **Approve TOR** when satisfied. This locks the TOR and unlocks Step 2.

THE 5 TOR SECTIONS

1. Purpose & Mandate
2. Team Roles & Responsibilities
3. Ways of Working
4. Decision Making Authority
5. Reporting & Escalation

STEP 2 OF 5

Problem Statement

Upload Source Files

Click **Upload Source Materials** . Supports **TXT**, **DOCX**, **XLSX**, **PDF** . Upload all research, meeting notes and interview transcripts.

Paste Raw Notes

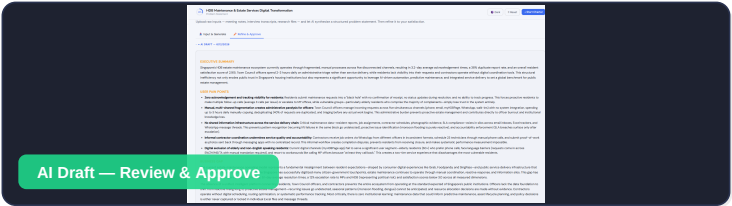

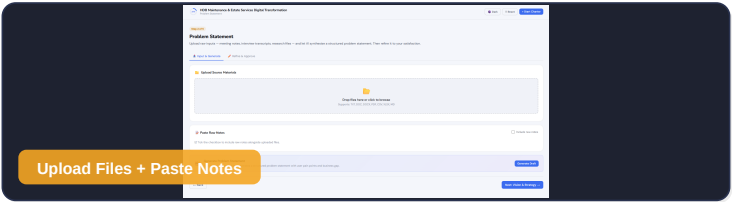

Tick **Include raw notes** and paste unstructured notes directly into the text box — no formatting needed.

Generate Draft

Click **Generate Draft** . AI synthesises across all your uploaded files into a structured Problem Statement.

Refine & Approve

Switch to the **Refine & Approve** tab. Edit if needed. Click **Approve & Save** to lock this section.

THE 5 PROBLEM SECTIONS

1. Executive Summary
2. User Pain Points
3. Business Gap
4. Impact of Inaction
5. Key Assumptions

STEP 3 OF 5

Vision & Strategy

Enter Product Details

Fill in **Product Name** , **Industry/Domain** and **Target Users** at the top of the Vision section.

Upload Strategy Docs

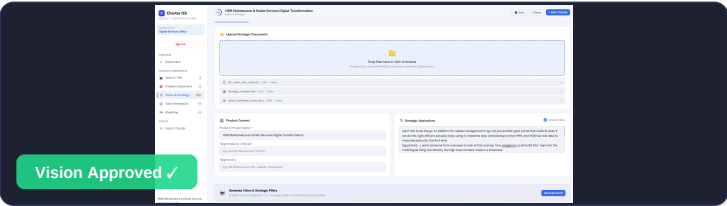

Upload strategic papers, exec briefings, workshop notes. AI reads these alongside the **approved Problem Statement** .

Generate Vision

Click **Generate Draft** . AI crafts a vision statement, mission, strategic pillars and success metrics.

Approve Vision

Switch to **Refine & Approve** tab. Click **Approve & Save** . Vision then feeds directly into the KPI Agent.

THE 5 VISION SECTIONS

1. Vision Statement
2. Mission
3. Strategic Pillars (5-7)
4. Strategic Differentiation
5. Success in 3 Years

STEP 4 OF 5

Value Realisation

Generate KPIs

On the **AI Recommend** tab, click **Generate Recommendations** . AI reads Problem + Vision and suggests 6-8 SMART KPIs.

Review KPI Table

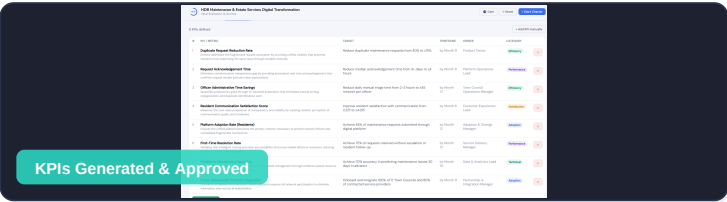

Switch to **KPI Table** tab. Review each KPI — **name** , **target** , **timeframe** , **owner** , **category** . Edit or remove any.

Upload Cost & Benefit Data

On the **Cost Benefit Analysis** tab, enter **benefit values** per KPI and upload your **cost estimates Excel** file.

Generate & Approve CBA

Click **Generate CBA** . Review the financial narrative and charts. Click **Approve CBA** to complete this section.

THE CBA VIEW SHOWS

- SGD Summary Cards (investment, benefit, ROI)
- Cost vs Annual Benefit bar chart
- Benefit by KPI donut chart
- 3-Year Cumulative Net Position
- Download Full CBA Excel

STEP 5 OF 5

Product Roadmap

Set Parameters

Enter **start date** , **total duration** and **number of phases** . Set **team size** — the AI uses this for task estimation.

Enter Epics

Type your key epics, features and deliverables in the **Epics / Features** text box. One per line works best.

Generate Roadmap

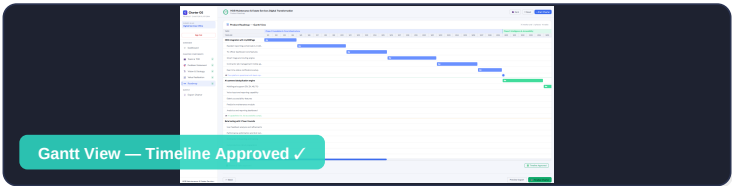

Click **Generate Roadmap** . AI structures phases, assigns tasks, sets durations and identifies milestones.

Approve Tasks

Review phases and tasks. Click **Approve Phases & Tasks** — this is Gate 1 of 2.

Approve Timeline

Review the Gantt chart. Click **Approve Timeline** — Gate 2 of 2. Roadmap is now 100% complete.

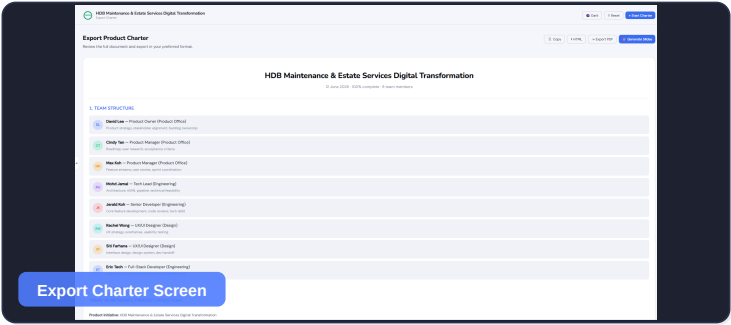

TWO-STAGE APPROVAL

- Gate 1: Approve Phases & Tasks
- Gate 2: Approve Gantt Timeline
- Both gates must be passed to reach 100%

EXPORT

Export Your Charter

Export PDF

Full charter document with all approved sections, **Gantt chart** and **CBA charts** embedded. Ideal for formal submission.

Generate Slides

10-slide management presentation deck auto-generated from your charter. Ready for **steering committee** briefings.

Export Backup

Full JSON backup of your charter state. Use **Import Backup** to restore, share or migrate anytime.

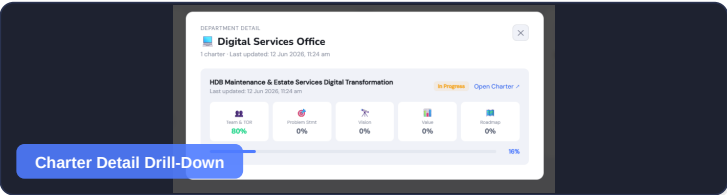

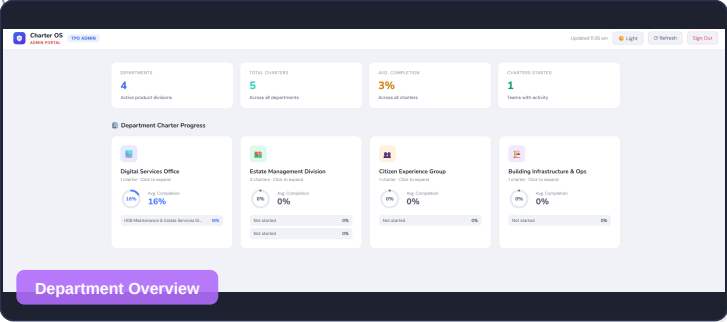

Copy / HTML

Copy all charter content as clean HTML to clipboard — paste into **any document tool** or email.

FOR TPO ADMINISTRATORS

Admin Portal

Access the Admin Portal using the TPO admin password. Get real-time visibility across all departments and charters without needing team

Department Tiles

4 department tiles showing avg completion % with progress rings. Click to expand.

Charter Drill-Down

Click any tile to see section-by-section breakdown — Team & TOR, Problem, Vision, Value, Roadmap.

Read-Only View

Click Open Charter to view any team's full charter without editing. Shows a purple read-only banner.

Auto-Refresh

Dashboard refreshes every 60 seconds. Hit Refresh manually for instant update.

TIPS & TROUBLESHOOTING

Good to Know

Work in order

Each section builds on the previous. Complete and approve Team & TOR before Problem Statement, and so on. The AI uses approved content as context.

Upload more files

The more source material you give each AI agent, the better the output. Don't hold back — upload everything relevant.

Regenerate freely

Not happy with a draft? Click [Regenerate](#) as many times as needed. Once approved, click the [section name](#) in the sidebar to revisit.

Export backup often

Use [Export Backup](#) regularly to save a JSON snapshot. If you clear accidentally, [Import Backup](#) restores everything.

Load sample data

On the dashboard, click [Load Sample](#) to see a fully populated charter — great for understanding what each section should look like.

Approval is a gate

Once a section is approved, it feeds into the next AI agent. If you want to change an approved section, revisit it and regenerate before the next section is started.

Session auto-saves

CharterOS [auto-saves](#) to the cloud every few seconds. Safely close the browser and return — your progress is always preserved.

One charter per team

Each team password has one charter. To start fresh, use [Clear Charter](#) — but this permanently deletes all content (export a [backup](#) first!).

Charter Completion Checklist

Work through all 5 steps in order. Each section must reach 100% before the next AI agent can use it as context.

01

Team Structure & TOR

☐ Add all team members with roles and responsibilities

☐ Set up meeting cadence (standups, reviews, planning)

☐ Click Generate TOR — review all 5 sections

☐ Click Approve TOR to lock in and reach 100%

02

Problem Statement

☐ Upload source materials (TXT, DOCX, XLSX, PDF)

☐ Paste any raw notes if needed

☐ Click Generate Draft — review on Refine & Approve tab

☐ Click Approve & Save to lock in and reach 100%

03

Vision & Strategy

☐ Enter product name, industry and target users

☐ Upload strategy documents and exec papers

☐ Click Generate Draft — review vision and pillars

☐ Click Approve & Save to lock in and reach 100%

04

Value Realisation

☐ Click Generate Recommendations for AI-suggested KPIs

☐ Review KPI Table — edit targets, timeframes, owners

☐ Upload benefit values and cost estimates Excel

☐ Generate CBA then Approve CBA to reach 100%

05

Product Roadmap

☐ Set start date, duration, phases and team size

☐ Enter epics and key features

☐ Generate Roadmap — review phases and tasks

☐ Approve Phases & Tasks then Approve Timeline to 100%

REMEMBER: All 5 sections must reach 100% for the charter to be Complete · 100% = all sections fully approved · Export only available at 100%
