

Product Charter — Powered by AI.

CharterOS guides Product Office teams through every stage of charter development, with 6 Agentic AI agents doing the heavy lifting and humans approving at every gate.

HOW IT WORKS

A 5-Step Guided Journey

- 01 Login & Start Charter**
Team logs in with unique password. Charter is named and the 5-component journey begins with a clear progress dashboard.
- 02 Problem Statement**
Upload meeting notes, research files, transcripts. AI synthesises User Pain Points, Business Gap and Impact of Inaction.
- 03 Vision & Strategy**
Upload strategy docs. AI crafts vision statement, mission and 5-7 strategic pillars grounded in the approved Problem.
- 04 Value Realisation**
AI recommends SMART KPIs from approved content. Upload Excel estimates for full CBA with ROI and payback period.
- 05 Roadmap & Export**
AI generates phased roadmap and Gantt chart. Two-stage approval. Export as PDF, slides, CBA Excel or JSON backup.

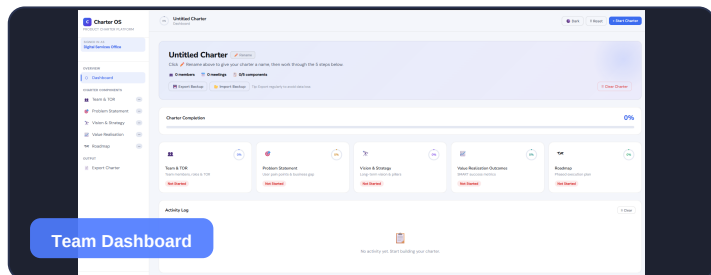

KEY CAPABILITIES

What Makes It Different

- Bring Your Own Documents**
Upload TXT, DOCX, XLSX, PDF or paste raw notes. AI reads across all files simultaneously — no blank slate.
- Context Carry-Forward**
Each AI agent reads approved outputs of prior sections. KPIs trace to Vision; Vision grounds in Problem.
- Human in the Loop Governance**
Every section requires explicit human approval. AI generates — humans decide. Full audit trail kept.
- TPO Admin Oversight**
Live dashboard shows progress across 4 departments and 5 charters. Drill down to any charter in read-only view.

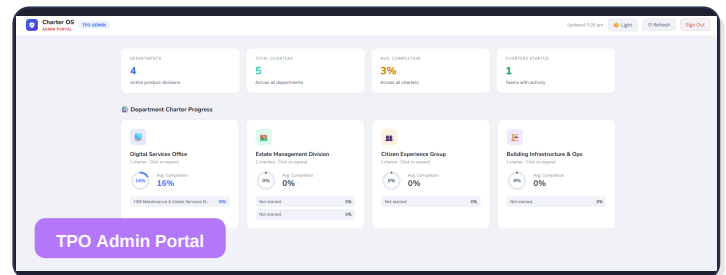

IN ACTION

See It for Yourself

Team Dashboard

Each team gets a personalised workspace showing charter completion across all 5 components. Progress rings update in real time as sections are drafted and approved — giving every member a clear view of where the charter stands.

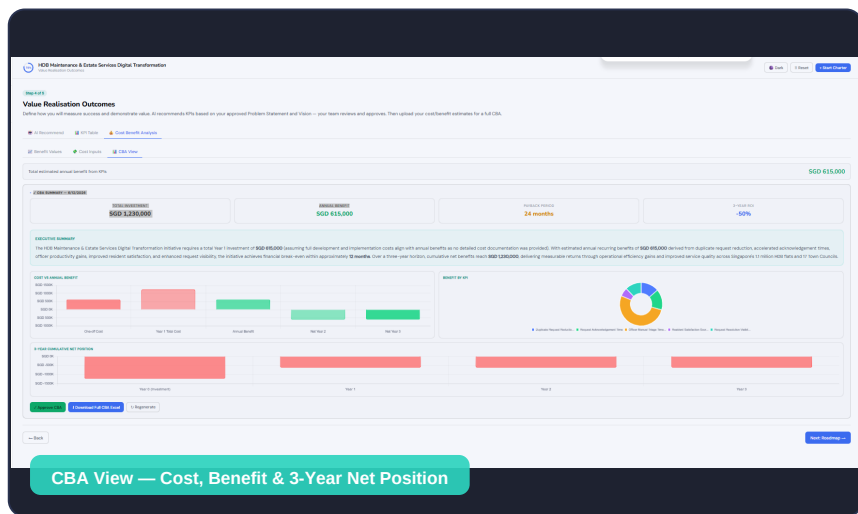

TPO Admin Portal

TPO Administrators get a live overview of all departments and charters on a single screen. Click any department tile to drill down to section-level completion, then open any charter in read-only view — no login required.

COST BENEFIT ANALYSIS

AI-Generated Financial Justification

SGD Summary Cards

Total investment, annual benefit, payback period and 3-year ROI shown instantly at the top.

Cost vs Benefit Chart

Bar chart comparing one-off costs, Year 1 total, annual benefit, and net Year 2 and 3.

Benefit by KPI

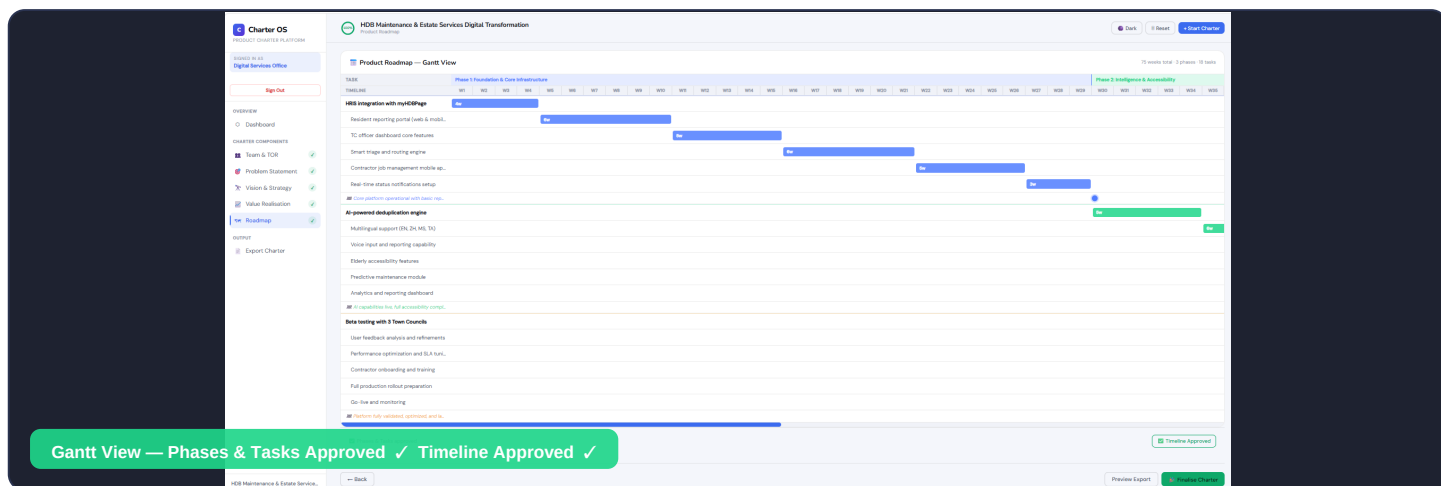

Donut chart showing each KPI's share of total annual financial benefit.

3-Year Net Position

Waterfall chart tracking the investment-to-return journey from Year 0 to Year 3.

PRODUCT ROADMAP

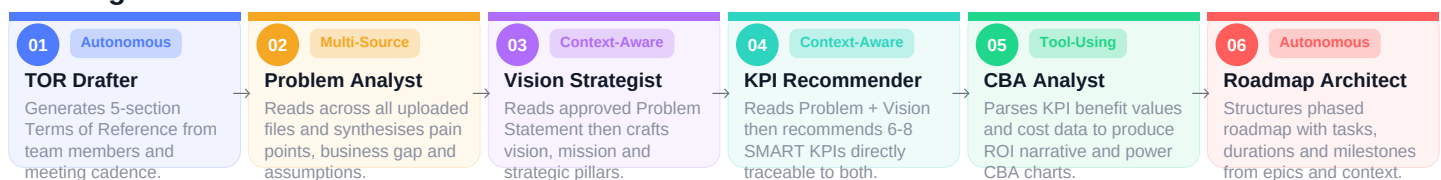

AI-Generated Gantt Timeline

- Phase Bands**
3 colour-coded phase bands with week-by-week task bars and milestones
- Two-Stage Approval**
Phases & Tasks gate first, then Timeline — two human sign-off steps
- Week Columns**
W1–W35 timeline with coloured bars showing duration for each task
- Auto-Generated**
Roadmap Architect agent decides phases, sequencing and durations

THE 6 AGENTIC AI AGENTS

Each Agent Has One Goal. Each Builds on What Came Before.
